Eliseo Canales

AI & Data Science Student | Python | SQL | Power BI | Machine Learning | FastAPI

Ecuador | eliseoc.dev@gmail.com | github.com/eliseoc-dev

PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science student with hands-on portfolio experience in data analytics, business intelligence, machine learning, backend development, and defensive cybersecurity. Built end-to-end projects using Python, SQL, Power BI, Pandas, scikit-learn, FastAPI, React, and TypeScript, with automated testing, dashboards, secure APIs, and reproducible workflows.

TECHNICAL SKILLS

Data & BI: Python, SQL, Pandas, NumPy, Excel, Power BI, DAX, SQLite, MySQL, KPI analysis, data visualization
Machine Learning: scikit-learn, classification, Logistic Regression, Random Forest, feature engineering, F1-score, ROC-AUC, model persistence, Streamlit
Backend / Full Stack: FastAPI, REST APIs, SQLAlchemy, CRUD, JWT, OAuth2, React, TypeScript, JavaScript, HTML, CSS, Vite
Security & Tools: Argon2, rate limiting, security headers, secrets management, pytest, Git, GitHub, VS Code, Jupyter Notebook

FEATURED PROJECTS

Retail Sales Analytics Dashboard | *Python* | *SQL* | *Excel* | *Power BI* | *Streamlit*
- Built an end-to-end analytics workflow on ~50,000 synthetic sales records, covering cleaning, KPI analysis, SQL queries, and data visualization.
- Created Excel pivot-table analysis and a Power BI dashboard with DAX measures; added Streamlit reporting and automated tests.

Customer Churn Prediction | *Python* | *Pandas* | *scikit-learn* | *Streamlit*
- Built a classification workflow with preprocessing, feature engineering, Logistic Regression and Random Forest model comparison.
- Evaluated with precision, recall, F1-score and ROC-AUC; generated confusion matrix, ROC curve, feature importance, persisted model, and Streamlit app.

Secure API Lab | *Python* | *FastAPI* | *SQLAlchemy* | *JWT* | *OAuth2* | *pytest*
- Hardened a REST API with Argon2 password hashing, JWT/OAuth2 authentication, role-based authorization, rate limiting, security headers, logging, and environment-based secrets.
- Created automated API/security tests and documented vulnerability remediation and before/after security controls.

Pharmacy Management System | *FastAPI* | *React* | *TypeScript* | *MySQL* | *SQLAlchemy*
- Developed a full-stack CRUD application with product search/filtering, category and supplier management, low-stock alerts, and expiration tracking.
- Implemented backend/frontend automated tests and structured error handling.

ADDITIONAL PROJECTS

AI Code Review Assistant - Python AST/pattern-based static analysis for risky code, maintainability issues, severity scoring, suggestions, and Markdown reports.
Financial Manager - Python/SQLite finance application with transaction tracking, filtering, validation, summaries, and automated tests.

EDUCATION & LANGUAGES

Bachelor's Degree in Artificial Intelligence and Data Science - UTEL University, Currently enrolled
Languages: Spanish (Native) | English (Basic)
